NEUROSCIENCE & PUBLIC POLICY SEMINAR

THE ART, SCIENCE AND ENGINEERING OF CREATING A RESEARCH INSTITUTE AT A LARGE PUBLIC UNIVERSITY

JOHN D. WILEY
WISCONSIN INSTITUTE FOR DISCOVERY, UW MADISON

FRIDAY, SEPTEMBER 11
4:00 PM
341 BARDEEN

Research institutes begin with a concept and end with a brick and mortar reality. Between the concept and the conclusion lies the work of many individuals who are drawn from fields as disparate as finance and art. While some of the work involved in creating a research institute may appear obvious, much of it remains a mystery to the average citizen. Two research institutes, one private, the Morgridge Institute for Research, and one public, the Wisconsin Institute for Discovery, are now being constructed on the UW-Madison campus. The origin, birth and development of these two research institutes will be discussed.
